ÇANKAYA UNIVERSITY
Software Engineering Department
SENG 491 – 492 Project Selection Form

Three copies of this form should be signed, one for the student, one for the supervisor, and one for the department files.

Part I. Project Team Member(s). To be completed by the Student(s).

Student Number	2 0 2 0 2 8 0 2 4	**Signature**	
		E-Mail	c2028024@student.cankaya.edu.tr
Student Name	Dila Hevin TÜMÜR	**Mobile**	0 (532) 438 44 26
Student Number	2 0 2 1 2 8 2 0 3	**Signature**	
		E-Mail	c2128203@student.cankaya.edu.tr
Student Name	Tanayça ÜNLÜTÜRK	**Mobile**	0 (507) 730 89 02
Student Number	2 0 2 1 2 8 0 2 0	**Signature**	
		E-Mail	c2128020@student.cankaya.edu.tr
Student Name	Çağan SEZİM	**Mobile**	0 (533) 140 16 87
Student Number	2 0 2 0 2 8 0 0 3	**Signature**	
		E-Mail	c2028003@student.cankaya.edu.tr
Student Name	Eda KOCAMAN	**Mobile**	0 (537) 704 21 38
Student Number		**Signature**	
		E-Mail	
Student Name		**Mobile**	

Part II. Project Information. To be completed by the Student and the Supervisor.

Starting Term	2 0 2 4 / 2 0 2 5	x Fall	☐ Spring
Title of the Project	AI Driven Pet Disease-Diagnosis-Treatment Manager Tool for both Veterinarians and Pet Owners (Pet Care SaaS Platform)		
Project Description			

This project is a multiplatform SaaS solution designed to streamline interactions between pet owners and veterinarians. It features both web and mobile applications built in .NET, offering various tools to improve pet health management.
Pet owners can submit health-related media (e.g., photos, videos) and fill out AI-integrated voice surveys to receive a preliminary diagnosis for their pet's condition. The platform also enables users to compare their pet's health data with other animals that received the same official diagnosis from veterinarians, helping them make informed decisions.

Additionally, the platform offers features such as price comparisons for treatments, a map of nearby veterinarians within a 10 km radius, appointment booking, pet-friendly taxi and shop services, and payment processing (via the app or in cash). When an appointment is made, veterinarians receive notifications with attached medical surveys and AI diagnoses for review before the visit.

Part III. Company Information and Approval (if applicable)

Company Name			
Address			
City		**Web Page**	
Contact Name		**Phone**	
Seal and Signature		**Date**	

Part IV. Supervisor(s) Approval.

Supervisor Name	İsmail Bora ÇELİKKALE	**Signature**	
Department	Software Engineering	**Date**	10/10/2024
Co-supervisor Name		**Signature**	
Department		**Date**	
Assistant Name	Buse EROL ESİRİK	**Signature**	
Department	Software Engineering	**Date**	10/10/2024
